Art Unit: 2165

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: the specification is very poorly written and full of grammatical mistakes e.g., "be controlled every user" (page 4; line 1) does not make any sense.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claims 1 and 2, Applicant states

"receiving means for receiving ..."

"list forming means for forming a list ..."

"holding means for holding ... the list ..."

"extracting means for, if the search request ... comparing the list held by said holding means ... with the list formed by said list forming means ..."

Application/Control Number: 10/784,973

Art Unit: 2165

Here a request for a list is received; a list is prepared based on the request; the list is held/stored; the held list and the list formed by the list forming means are compared.

Examiner is not sure what exactly is compared since the held list and the list formed by the list forming means are the same list. The list is first formed and then held.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 5. Claims 1-13 are rejected under 35 U.S.C. 102(e) as being anticipated by James Michael Metz, US Patent Publication No. 2004/0019671 and hereinafter referred to as Metz.

As to claims 1,2,6,912 and 13, Metz teaches a network device (Fig. 4A; [0004]) managing apparatus comprising: receiving means for receiving a search request of network devices and identification information from a data processing apparatus (Fig.

Art Unit: 2165

4A; [0004]); list forming means for forming a list of the network devices ([0005]); holding means for holding the identification information received by said receiving means and the list formed by said list forming means in association with each other ([0018]); extracting means for, if the search request and the identification information are received by said receiving means, comparing the list held by said holding means in association with said identification information with the list formed by said list forming means after said search request was received by said receiving means and extracting network devices which have newly been found ([0018];[0026]); data forming means for forming data which emphasizes the network devices extracted by said extracting means and which is used to display the list of the network devices([0040]); and data transmitting means for transmitting the data formed by said data forming means to said data processing apparatus (i.e., displayed in the users' or administrators' computer screen) (Fig. 6).

As to claims 3 and 10, Metz teaches wherein said list indicates at least one of information regarding whether printing is possible or not and an error state ([0021]).

As to claims 4,7 and 11, Metz teaches wherein the data formed by said data forming means includes an emphasis mark to emphasize ([0040]).

Application/Control Number: 10/784,973

Art Unit: 2165

As to claims 5 and 8, Metz teaches wherein the data formed by said data forming

means includes instruction data for allowing a device icon of the data processing

apparatus to be displayed in an updated state (Fig. 5).

Points of Contact

6. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Apu M. Mofiz whose telephone number is (571) 272-

4080. The examiner can normally be reached on Monday – Thursday 8:00 A.M. to 4:30

P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Jeffrey Gaffin can be reached at (571) 272-4146. The fax numbers for the

group is (571) 273-8300.

Any inquiry of a general nature or relating to the status of this application should

be directed to the Group receptionist whose telephone number is (703) 305-9600.
